## **One Step At A Time: Toward Sustainability**

### **LESSON PLAN**

#### **Objectives**

Students will:

- write a well supported expository paragraph.
- look for related information to support the topic sentence.
- write a topic sentence containing a controlling idea.
- use the internet or other sources to gather information on ways to conserve water.
- learn the meaning of the term *Sustainable*.
- become aware that by fostering sustainable behavior we will have a greener future.

#### **Procedure**

The instructor will explain how to write an expository paragraph using the writing textbook.

Then the instructor will introduce the term sustainable by asking a series of questions. The instructor will ask the students why they think it is important and necessary to change our decisions and actions .

The students will brainstorm on ways to reduce water consumption.

The students will write a paragraph on, *How to Reduce the Daily use of water at Home*.

#### **Evaluation**

A rubric for an expository paragraph will be used to evaluate the students 'writing.
