

Professor David Merves
Environmental Sustainability
North Campus

Who: Jou 1100 Basic Reporting students

What: Final reporting assignment or extra credit story idea

When: Due date: final reporting lab of semester

Why: Learning Outcome No. 10: "Describe how natural systems function and recognize the impact of humans on the environment."

Where: Any campus of Miami Dade College

How: Websites and links/reporting for story (minimum three pages)

"Basic Reporting" students: To develop an appreciation on environmental issues, including global warming, the greening of communities, and hurricane preparedness, students may choose a story idea concerning "environmental sustainability" for their final reporting assignment or an extra credit story.

You may use "Library Resources for Teaching Sustainability"
prepared by West Campus Librarian Steve Kronen.

http://www.earthethicsinstitute.org/facultycurriculum_pdf/Kronen_LibraryResources_Sustainability.pdf

Web sites and links provided will assist students in story ideas concerning "environmental sustainability" at any of MDC's campuses. Upon your research, you will identify a story idea at one of the campuses and identify at least three sources to interview for your information and content.
