- Visit the Center for Community Involvement and register for a minimum of five hours of Service Learning (SL)
- Select a MDC approved organization that fosters the protection of natural resources in Miami Dade or Broward counties
- Deliver a 3-5 minute informative or persuasive presentation which targets the following topics regarding sustainability:
 - Immerse yourself in a natural resources setting and select three predominant plants or trees. Explain how the plants or trees selected contribute to a healthy eco-system of South Florida
 - Explain if the plants or trees selected currently run the risk of extinction
 - How can we prevent the plants or trees selected from extinction? Explain
 - Cite two scholarly sources which support claims or arguments
 - Provide a presentation aid which clearly helps visualize the plants or trees selected
 - Address three Learning Outcomes (LO) listed in the Syllabus which support the SL project. Briefly analyze each LO
