SLS 1125 – Student Support Seminar

Fostering Behavior for Sustainability

Tied into the *Values, Goals, and Time: Managing Yourself* and *Critical, Creative, and Practical Thinking: Solving Problems and Making Decisions* chapters of my SLS 1125 course. The assignment highlighted values and problem solving and changing behavior.

Screen the video TAPPED in class and lead a discussion about the videos impact on our values and thinking. This video is a powerful statement regarding our society's value for convenience at the cost of the environment.

Discuss what we can do as a society to effect change.

Assign students to write a personal statement about what he/she is going to do to help alleviate this situation (ie: stop using bottled water, help with coastal clean ups, etc.).
