

Project 3.0

Bike Miami Station

Bicycle Transit Center

Objective:

The purpose of this project is to design a Multi Story Bike Station conveniently situated in Downtown Miami.

Program:

The bike station itself will provide 200 parking spaces and a repair service for bicycles. It will include a bike shop, a café restaurant and bicycle rental service.

This station will sell Metro and bus tickets and will provide schedule information.

Also within the center, the Bike Miami Action Committee will offer information about bicycle lanes and routes, as well as the Bike Miami special events.

Precedents:

1. **Bike Station, Freiburg Train Station**
Architects | Rolf and Hotz, Freiburg i. Br.
2. **Union Station bicycle transit center**
Washington DC. Architects: KGB Design Studios
3. **Bicycle Flat**
Amsterdam. VMX Architects
